Theme of the Month :

Harmony

Harmony (화목)

In one family, the warm love and trust that blooms from the relationship between parents and children, and husband and wife is deepened based on the family ethics of humanity. Parents grow their children into the right personality through their children's education full of love, and their children become precious members of society and humanity in a healthy manner.

Children reflect the appearance of a family. Since children's healthy growth is based on the couple's harmony and love for their children, raising them properly means maintaining a harmonious marital relationship and strongly trusting their parents. The appearance of a couple maintaining a harmonious relationship is a stable family and an important nourishment for their children's growth.

Mission:

- Say I love you to all family members, and take a video (Ex: Parents, Grandparents, Siblings, Cousins, Aunts, Uncles etc.)
- Writing a letter to your Parents with gratitude and love.
